

The best solution with the right partner

We are a company That supplies industrial equipment and spare parts. We represent world famous brands in the North and West Africa. Our engineers trained and assisted by our partners offer quality after-sales service.

Nos partenaires :

ROVEMA is a German brand which is one of the world leaders in the manufacturing of bagging, cartoning and case packing machines.

It offers a very wide range of machines equipped with control systems and high performance components at the cutting edge of technology with very high speeds. Among its customers, Rovema has world renowned brands in the production and packaging of flagship products such as short pasta, sugar, powdered milk, salt, coffee, snacks and pulses...

Rovema dosing system :

Volumetric screw feeder _SD:

Designed for dosing powdered products, powders and fine granules, such as:

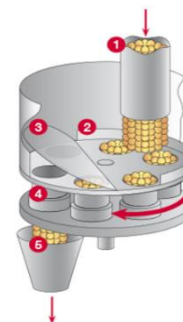

- milk powder
- coffee
- spices
- sugar and chemicals....

VDD cup volumetric dispenser:

Ideal solution for free-flowing or granular products:

- Nuts
- Cereals
- Rice
- Food for animals ...

Combinations with Associative Weighers

The associative weighing machine is an instrument composed of several weighing cells and an ideal calculation software for quickly and accurately dosing, all agro-food products in granulated or chunky form such as short pasta, candies, dry cakes, snacks, frozen products, vegetables and dried fruits...

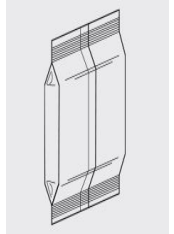

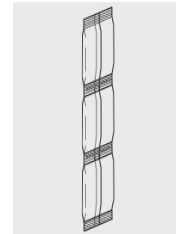

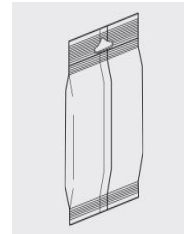

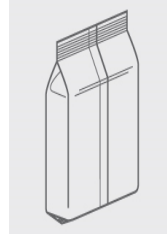

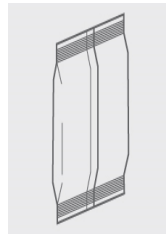

BVK 260

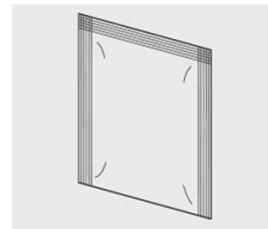

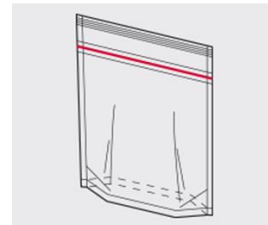

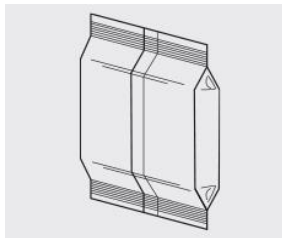

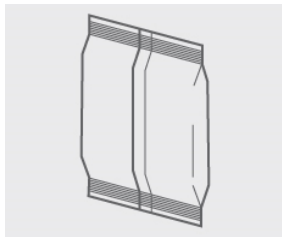

Vertical continuous motion bagging machine

- ▶ Up to 120 bags/minute
- ▶ Format range from 60 mm to 260 mm
- ▶ Ideal for standard type bags such as “pillow” bags and flat-bottomed “block” bags.

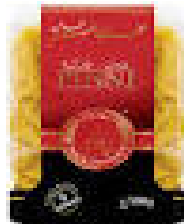

BVC

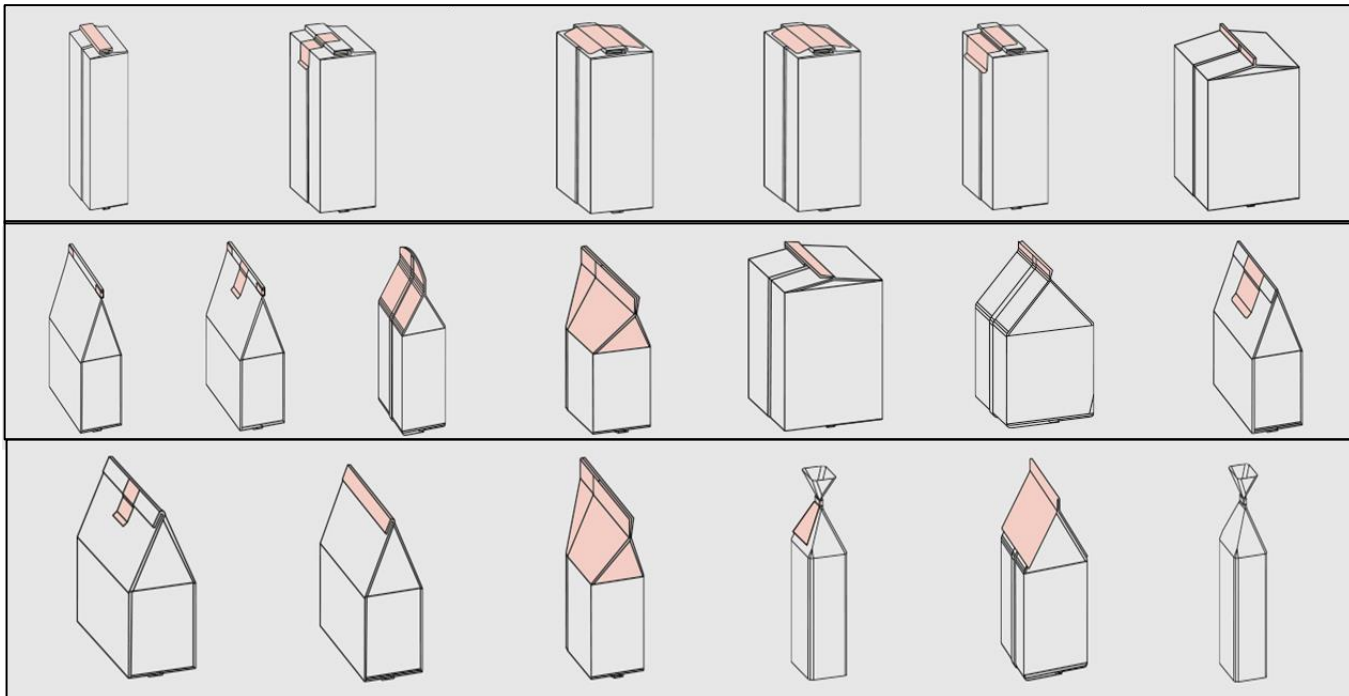

SBS " Brick " Bagging machine

- The SBS Block Pack machine is the technological result of the combination of a vertical bagging machine with a bag making and closing device.
- High flexibility with quick and easy format changeover

More than 40 types of bag heads possible for future flexibility

Horizontal cartoner CMH

Specially designed for bag-in-box applications up to 225 folding boxes per minute

Vertical continuous cartoner CMV

The CMV vertical cartoner can be used with one or two integrated bagging machines:

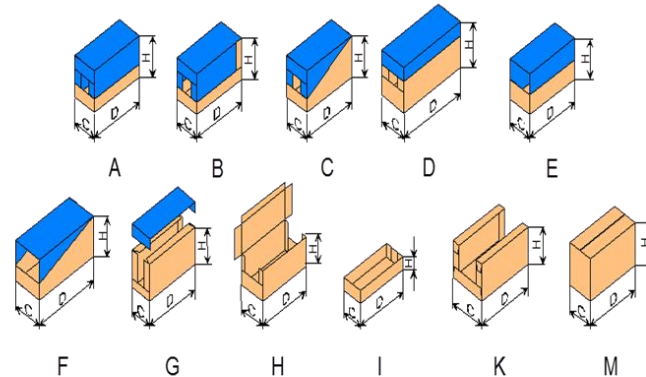

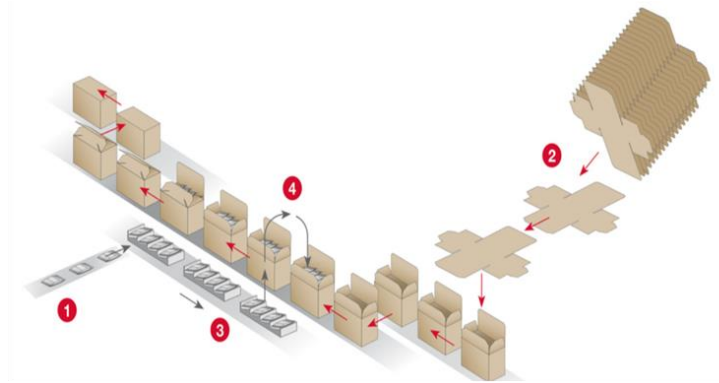

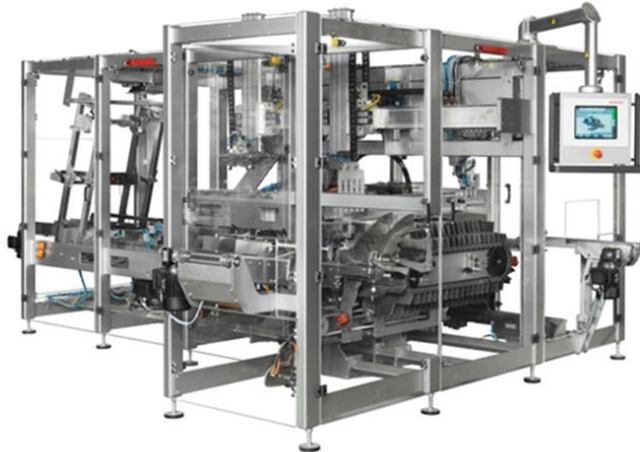

- The bag in box case
- Produced in the case 'direct case filling'.

All its possibilities in one compact machine

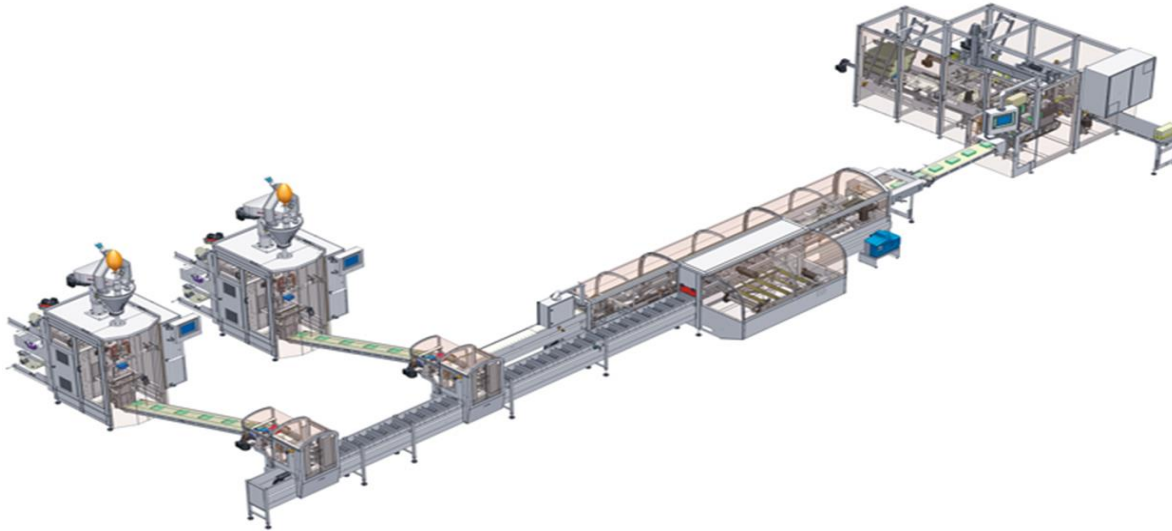

Case packing machines

- This optimal process makes it possible to produce cases with a perfect geometry.
- Execution by adhesive tape or hot-melt gluing
- Small footprint due to compact design

Rovema turnkey systems

- Customized solutions
- Packaging lines from bagging machine to the end of line

The best solution with the right partner
